WHOLESALE PRICE LIST

OF THE

Jefferson County Nurseries,

For the Fall of **1890.**

CARPENTER & GAGE, Props., -:- FAIRBURY, NEBRASKA.

TERMS AND CONDITIONS.

TO THE TRADE:—In offering this Price List we wish to thank our many patrons for the kind favors shown us in the past, and would further say that with increased shipping and handling facilities, a larger and more complete stock, and competent help, we hope to do even better by you than we have in the past.

1st. Packing done in the most thorough manner in good boxes or bales for which we charge enough to cover cost.

2nd. Free delivery at railroad depot here, and at Kesterson, Nebraska. We take every precaution in packing and forwarding, but will in nowise be responsible for delay or damage to stock in transit.

3rd. Terms, five per cent. discount on orders from this list paid in full before shipment.

Parties wishing to pay cash in advance should state quantity of stock wanted early, that we may estimate cost of packing.

Orders from unknown parties must be accompanied by one-fourth cash; balance before shipment.

Remit by draft, P. O. Order, registered letter or money by express—not private check.

VARIETIES—We will supply varieties as far as possible, but reserve the right to substitute unless ordered to the contrary.

While we use all due precaution to have stock true to name, in no case will we be responsible should a mistake occur for more than the actual price paid for the stock.

Our office and packing grounds are only two blocks from the Grand Island depot.

A side track passes through our grounds and we load cars direct from the packing house.

TO DEALERS:—We offer all the facilities found in the west, such as dealers' sheds and hydrants with hose for watering stock. When orders exceed $100.00 we furnish tie, labels and tags free. Our charges for labor in billing out will be found moderate. Stock from other growers cannot be brought on our grounds to pack unless we are unable to supply the same, and then only with our permission.

Dealers are requested to carefully aggregate their orders, giving size or age per our list, that no delay or errors may occur in filling orders or making out bills.

Our shipping facilities are the best. We ship by three express companies and three different railroads—the B. & M., St. Joe & Grand Island in connection with the U. P. and the Chicago & Rock Island.

Orders should be sent in early, as our stock is limited. Correspondence solicited. 5 trees at 10 rates; 50 trees at 100 rates; 500 trees at 1000 rates.

We want it distinctly understood that on a general bill of goods, such as dealers use, we will not be undersold by any firm west of the Mississippi river.

REFERENCES The Goodrich Bros. Banking Company and First National Bank of Fairbury, Nebraska.

Special prices on large orders.

NOTICE—Would call special attention to our fine block of two-year-old apples and to our fine stock of white ash seedlings, of which we have the largest stock in the United States We would also call attention to our fine stock of Osage hedge and two year apple seedlings, which we offer very low. We have also a line lot of nursery grown shade trees of all sizes suitable for western planters.

STANDARD APPLE.	PER 10	PER 100	PER 1000

RUSSIAN APRICOTS.

GIBB—Tree hardy and symmetrical. A good bearer. Fruit medium size; color yellow; flavor sub-acid, rich, juicy; season, June 20th. The best early variety. Ripening with the strawberry, it cannot help proving a great acquisition to the list of Northern fruits.

ALEXANDER—Tree hardy. An immense bearer. Fruit large size; color yellow, flecked with red, both skin and flesh; a beauty; flavor sweet, delicious; shrub oblong; season, July 1st. One of the very best.

NICHOLAS—Tree hardy. A splendid bearer. Fruit medium to large; color white, flavor sweet, melting; season, July 10th. A handsome and valuable variety.

ALEXIS—Tree hardy. An abundant bearer. Fruit yellow with red cheeks; size large to very large; flavor slightly acid, rich and luscious; season, July 15th. A good sort.

CATHARINE - Tree hardy, vigorous and productive. Fruit medium size; color yellow; flavor mild, sub-acid, good; season, July 20th.

J. L. BUDD—Tree a hardy, strong grower and profuse bearer. Fruit large size; color white with red cheeks; flavor sweet and extra fine with sweet kernel, as fine flavored as the almond and used for the same purpose. The best variety and a decided acquisition. Season, August 1st.

THE ACME APRICOT.

A new apricot from Northern China which was given to Professor J. L. Budd by a returned missionary. The tree is an immense grower, very hardy and productive. Fruit the very largest size, a sweet, delicious freestone; yellow with red cheek.

IMPROVED DWARF JUNEBERRY.

For several years we have been watching the Juneberry and have come to the conclusion that it is one of the most valuable berries, and it should be planted on every farm in the west. The wood is hard and firm and endures the extremes of our climate without injury. Its leaves are dark, glossy green and very much resemble the pear. The plant propagates from suckers. The flowers appear about the same time as the apple. The petals are white and five in number. The fruit is borne in clusters like the currant and ripens in June. It is bluish black when fully ripened. Its flavor approaches the huckleberry, a mild, very rich sub-acid. Most people like its quality and pronounce it delicious. It may be served with sugar and cream or cooked sauce, and is splendid canned for winter use.

NEW PLUMS.

BOTAN—JAPANESE—The best in leaf and growth of any of the Japanese plums; color bluish red with white bloom, exceedingly sweet, rich, juicy and delicious Ripens August 1st. Hardy where Wild Goose will stand.

OGAN—JAPANESE—Tree hardy. Fruit very large, heart-shaped; color reddish yellow; meaty and excellent. August 1st.

PRUNUS SIMONII—APRICOT PLUM—This new plum, a native of Northern China, is believed to be the most valuable new fruit introduced for many years, being hardy as far north as Central Iowa and Nebraska, and in protected situations even farther. It will ripen about the first of July in this latitude and shows no defects from attacks of curculio. It is very firm and meaty, and equal in flavor to any of the blue plums. It will carry any desired distance. Tree very thrifty, upright, an early and abundant bearer, stands drouth well and succeeds well in the Southern states.

POTTAWATTAMIE—A plum of the Chickasaw family, but quite distinct from any other variety. Perfectly hardy and an immense early annual bearer. Four year old trees are said to have borne a crop of two bushels to the tree. Fruit is yellow, overspread with a bright pink and prominent white dots; flesh beautiful golden yellow, luscious, good. Ripens in July. The sting of the curculio does not seem to effect the fruit, as every plum ripens evenly and perfectly. It is a good early plum, and cannot be surpassed for canning.
